

Hayes, A. F., & Rockwood, N. J. (2017). Regression-based statistical mediation, moderation, and conditional process analysis: Observations, recommendations, and implementation. *Behaviour Research and Therapy*, 98, 39-57.

## **Addendum**

In appendices A, B, and C of the article, the PROCESS command at the top of each output is appropriate for PROCESS v2. PROCESS v3 was released in December 2017, a year or so after this article was typeset and made publicly available through the publisher. PROCESS v3 is slightly different than v2 in the structure of the syntax. The equivalent commands in PROCESS v3 for SPSS are

### **Appendix A**

```
process y=use4/x=mbrp/m=crave2/cov=treathrs crave0/total=1/  
boot=10000/seed=10000/model=4.
```

### **Appendix B**

```
process y=crave2/x=mbrp/w=bdi0/cov=treathrs crave0/jn=1/  
plot=1/moments=1/model=1.
```

### **Appendix C**

```
process y=use4/x=mbrp/m=crave2/w=bdi0/cov=treathrs crave0/  
boot=10000/moments=1/model=7.
```
