

December 9, 2024, to April 9, 2025

Enrolling now!

Add a course by Professor Andrew Hayes, author of *Introduction to Mediation, Moderation, and Conditional Process Analysis*, to your academic schedule next term.

Taught by Andrew F. Hayes, PhD, creator of the PROCESS macro

Mediation, Moderation, and Conditional Process Analysis: The Complete Course

Effects that behavioural scientists study usually have boundary conditions (moderation) and always operate through some kind of mechanism (mediation) that is contingent on individual differences, context, or situation (moderated mediation). Using the principles of ordinary least squares regression analysis, this online course introduces the fundamentals of mediation, moderation, and conditional process analysis and their implementation, with a focus on the PROCESS macro invented by the instructor.

Taught asynchronously online
and with live office hours with
Professor Hayes
